Notes: Information is based on CalSCHLS data collected among in-school respondents during the 2024-2025 school year. Results are based on respondents who have filled out the online survey within 2 hours and have provided data for a certain number of survey items (80% or more). The survey completion time for a supplemental module was calculated by subtracting the Core survey completion time from the total time taken to complete both the Core and the supplemental module.

^AMedian survey completion time (50th percentile).

^BSurvey completion time in minutes for 95% of respondents.

^CThe lower bound of the range indicates the total number of survey questions, including branched items; the upper bound shows the total number of non-branched and branched questions.

^DThe BHM survey completion time was determined by aggregating the completion times from both randomized Form A and Form B.
